Specifications and applications are subject to change without notice. The information presented here is current and accurate to the best of our knowledge at the time of printing. **ALWAYS** verify weight applications by using the Steel Wheel Gauge and by careful visual inspection of the installed weight for proper and secure fit.

**BADA**® is QS-9000 / ISO 9001 Certified.

**WHEEL WEIGHT SELECTION SYSTEM – IMPORTANT!** Wheels come in a variety of rim styles. To insure proper, secure fit, selection of the proper weight is necessary. Our exclusive color-coded selection system makes correct application easy. We recommend the following procedure:

1. Use this color-coded application guide to select OEM weight type.
2. Verify application with color-coded rim gauge.
3. Select correct weight. Box labels are color-coded to match application guide and rim gauge.
4. Use color-coded wheel weight management system for storage of weights.

NOTE: For aftermarket or special OEM wheels, use the rim gauge to determine the best fit, or use Tape-A-Weight (TAW) adhesive weights.

**Steel Wheels:** Use PFE style (Thinkline Replacement) steel weights on flanges.

**1/2 ton or larger vehicles:** Use TFE style steel weights on flanges.

**CHROME PLATED ALLOY WHEELS:** Tape-A-Weight 9405-C chrome plated weights are recommended.

The primary weight listed is the weight for most common OEM wheels on this vehicle.

The secondary weight listed is a likely choice for optional or upgrade OEM wheel packages or other wheels where the primary weight isn't appropriate. If still unsure, use the rim gauge to make your selection.

## COLOR CODES/WEIGHT TYPES

Weight Type	Unit	Color Code
ALFE (ALC)	ounce	Red
MCFE (ALCMC)	ounce	Yellow
IWFE (ALCIW)	gram	Blue
ENFE (ALCEN)	gram	Green
FNFE (ALCFN)	gram	Orange
TFE (TTC)	ounce	Grey
PFE (THINLINE)	ounce	Black
TAW (TAW)	ounces	White

Color appears on label, application guide, rim gauge, and storage bins.
